

Location

Gmundnerstraße 1,
4812 Pinsdorf, AT

Building Type

former retail space (*tobacconist shop*)

Reuse

self-service shop for regional
products (24/7)

Usable Area

n / a

Governance Model

private (*operating couple*) +
network of regional producers

Opening

since February 2023

Initial Situation

- The former tobacconist shop remained vacant for an extended period
- Existing infrastructure remained unused
- Demand for local access to the regional food supply
- Limited opening hours of traditional direct sales

Reuse Strategy

Strategy: conversion of an existing retail space into a self-service shop with a digital access system (*app-based, cashless*)

Offer: regional food products & goods from local producers

Character: small-scale, automated, suitable for everyday use

Objectives

- Reactivation of a small-scale vacant space
- Improvement of local food supply
- Strengthening regional producers
- Low-threshold access to food (24/7)

Operational Concept

- Operated by private owners (*Hamminger family*)
- Cooperation with numerous regional producers
- 24/7 access without on-site staff

Key Actors

- **Operator:** private initiative (*Hamminger family*)
- **Partners:** regional farmers & direct marketers
- **Concept provider:** Dorfladenbox GmbH (*system & infrastructure*)

Key Features of the Project

- First Dorfladenbox implemented within an existing vacant space (*instead of a container solution*)
- Use of existing infrastructure without major structural changes
- Combination of digitalisation & regional food supply
- Low operating & personnel costs to automation

Transferability

What makes this example particularly instructive?

- Shows how small-scale vacant spaces can be efficiently reactivated
- Demonstrates scalable models for regional food supply
- Connects digital solutions with local economic structures

Who is this model suitable for?

- Municipalities with small vacant units in the town centre
- Regions with a need for local food supply
- Private initiatives & direct marketers
- Areas without traditional retail infrastructure
